EXPERIENCES

55 Knots (Nawtikuhl Pty Ltd)

Software Engineer (Full-Stack) | *Sydney, Australia, October 2023 – Present*

- Independently building a job portal application where employers are connected to a filtered pool of talents that match their criteria.
- Responsible in doing the design system development, and user experience research.
- Setup the whole development cycle with CI/CD pipeline.
- Handling both frontend and backend development using Angular or React, C# (.NET Core) or Node.js (Express) frameworks with clean architecture design, and Microsoft SQL/MongoDB for the database.

Sulzer Inc.

Web Developer (Full-Stack) | *Tampa, Florida, USA, September 2022 – September 2023*

- Managing the maintenance of existing client websites as per requests.
- Developed custom themes using Underscrores.me Wordpress theme template and custom page builder blocks using Gutenberg.
- Handling CRM development of Hubspot, and responsible also for email templates development.

Taxumo Inc.

Software Engineer (Full-Stack) | *BGC, Taguig City, Philippines, August 2017 – May 2023*

- Initially started handling design and frontend which I focused on user experience and creating wireframes and prototypes using Figma and using Angular as frontend framework in building it's SPA software.
- Responsible also in backend which includes developing RESTful API endpoints using C# (.NET Core) framework and creating database schema to be used for newly created functionalities that require new set of tables.
- Monitoring also the API endpoints through Azure Management Services which is performed daily if there are logical issues reflected.
- Tested Google Cloud Services and AWS as we venture other cloud services.
- Rotation of leading stand-up meetings and knowledge sharing to junior and intern developers.
